

OMNIA SME is built for growing SMEs that need big-business performance on small-business budgets. OMNIA SME provides always-on, enterprise-grade connection, protection and detection in one unified, scalable and fully managed solution.

A single intelligent device delivers SD-WAN networks and enterprise-grade cybersecurity. Plus, you can add more components, capacity, sites and users at your own pace.

OMNIA SME makes the complex simple. No juggling multiple solutions, vendors and contracts, and there's no need for in-house IT experts – just one subscription keeps your business securely connected, protected and compliant – and our re-tech promise comes as standard.

Available with low-to-no upfront costs, flexible contracts and monthly PAYG, OPEX or CAPEX options, OMNIA SME puts world-leading, enterprise-level technologies within SME reach.

OMNIA	BENEFIT FOR SMEs	WHAT IT MEANS IN PRACTICE
Affordable network & security	Enterprise-grade protection at SME-friendly prices	Strong cybersecurity and SD-WAN without big upfront spend
All-in-one platform	Connection, protection and detection in one solution	Fewer vendors, fewer tools, one simple monthly subscription
Grows with your business	Modular, scalable packages (LIT, BIZ, PRO)	Start small and add sites, users and features as you grow
Always-on connectivity	Resilient, intelligent networking	Eliminates downtime and delivers smoother application performance
No in-house IT needed	Fully managed and monitored by our specialists	You focus on business, not running complex infrastructure
Predictable costs	Low-to-no upfronts and OPEX-friendly pricing	Easier budgeting and cash-flow-friendly tech investment
Enterprise-grade partners	Built on world-class vendor technology	The same calibre of tools trusted by large organisations
Simplicity	Complex tech made simple for non-technical teams	Clear setup, support and management without jargon

Every OMNIA SME solution starts with:

HARDWARE

VENA & VECTA EDGE DEVICES

- One device, for all your OMNIA components
- Reduce cost, complexity and time spent managing hardware
- True Zero-touch rollout, scale instantly, save time
- As-a-Service model means no capital outlay

SD-WAN

ATOMIUS SDWAN

- More speed, more capacity, no licence tiers, zero upfront costs
- Ensures uninterrupted, secure business operations, fast delivering ROI
- Connect remote or challenging sites instantly – no location out of bounds
- Fast, easy integration with all OMNIA's scalable modules

CYBERSECURITY

INTEGRATED SASE

- True zero-trust Every user, device and application is checked and verified
- Best-in-breed tech – 99.9% malware block rate, 100% phishing protection
- Advanced security frameworks within you reach
- Purpose-built in-country gateways ensures data sovereignty

Then add more OMNIA components at your own pace

XDR

OMNIA XDR²

- Advanced AI threat detection stops threats in real time
- Streamlines security processes, freeing up IT resources
- 24/7 SOC centre experts monitor & respond to incidents for you
- Built-in compliance & reporting helps you meet regulations

REMOTE ACCESS

SASE SNIPER

- Zero-trust access: every user verified
- Secure for remote, hybrid & in-office teams everywhere
- Built-in logs and policies to enforce compliance
- Add new users in minutes

CLOUD ACCESS

ATOMIUS CLOUD

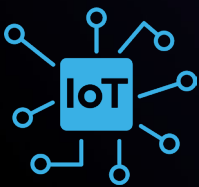

- Your gateway to cloud & multi-cloud
- Consumption-based billing model, monthly commit or PAYU
- Scales effortlessly as your business and cloud needs grow
- No need to install & manage multiple instances of SD-WAN in each IaaS & SaaS environment.

GLOBAL CONNECTIVITY

ATOMIUS CONNECT

- Connect sites in minutes, not weeks, for rapid business expansion
- Flexible cost-effective network connectivity
- Effortlessly add new locations globally as your business grows
- Centralised dashboard streamlines network control and visibility

IoT

OMNIA IoT

- Bypass the Public Internet Entirely connects securely & privately
- monitor, manage, and control all IoT devices in real time
- Automated Provisioning: ready to use within minutes, not days
- Available in more than 180 countries globally

ATOMNIA: Work faster, smarter and safer - everywhere and anywhere

ATOMNIA, selected by Belgian Defence as the best solution for securing critical infrastructure [START2DEF 2026] and backed by IGNITY, one of Europe's top deep-tech accelerators, is redefining and democratising advanced networking and cybersecurity for organisations of every size.

ATOMNIA is the only company on the planet with two double-accredited SD-WAN subject matter experts, led by a CEO who has advised the EU's CEN-CENELEC on data encryption. We don't just provide technology, we expertly integrate best-in-breed technologies with our own innovations to deliver uncompromising connectivity, multi-layered protection and AI-driven threat detection.

ATOMNIA has eliminated restrictive contracts, vendor sprawl and legacy pricing, giving you the power to scale on your terms, with interchangeable, always-on, resilient connectivity and defence-grade cybersecurity – no lock-ins, no barriers, no compromise. Ever.

Compliance

ATOMNIA delivers world-class networking and defence-grade cybersecurity that helps organisations meet the technical and operational demands of both the EU's NIS2 Directive and the UK's Cyber Security and Resilience Bill, from strong risk management and incident detection to resilience, visibility and secure remote access.

Sovereignty

ATOMNIA delivers EU Seal 3 digital sovereignty and complete data sovereignty by keeping your critical data and control planes within the jurisdictions you choose, using purpose-built in-country gateways and air-gapped cloud environments instead of sending data offshore.
